

PTS Diagnostics Now Providing eHealthScreenings with Fast Lipid (Cholesterol) and Glucose Screening Devices

Indianapolis, IN– June 10, 2014. PTS Diagnostics, the U.S.-based manufacturer of both the CardioChek® brand and the A1CNow® family of point-of-care diagnostic products, announced today that they have signed an agreement to provide their CardioChek Plus analyzers and lipid panel test strips to eHealthScreenings, a leading provider of onsite comprehensive wellness screening services.

Clients of eHealthScreenings include third-party administrators, employee assistance programs, human resources consultants, insurance providers, and wellness companies.

“We are excited to begin using the CardioChek system,” said Jason Morgese, President of eHealthScreenings. “We needed to make a switch to an analyzer that could provide lipid panel results faster, and after thorough evaluation of the available solutions, it was clear to us that the CardioChek analyzers delivered the speed that we need for large-scale on-site screenings.”

eHealthScreenings will use the CardioChek Plus, a cost-efficient, user-friendly diagnostic point-of-care analyzer that provides rapid on-site lipid panel plus glucose screenings. The capability to deliver both results in as little as 90 seconds enables healthcare professionals to screen more individuals faster. Offering simultaneous testing of a lipid profile (total cholesterol, HDL cholesterol, triglycerides) and glucose, the CardioChek Plus analyzer also calculates LDL cholesterol, TC/HDL ratio, LDL/HDL ratio, and non-HDL cholesterol. The CardioChek Plus device requires only a small blood sample from a fingerstick.

“We are proud to partner with eHealthScreenings,” said Robert Huffstodt, President and CEO of PTS Diagnostics. “As leaders in onsite testing for major organizations, they are among the companies that are changing the way modern healthcare is delivered. Their efforts positively impact the lives of many individuals, which is the essence of our mission.”

“Our services save organizations significant healthcare expense, but helping people identify ways to improve their health is the most important thing we do,” continued Morgese. “The CardioChek systems are fast and easy to use; they don’t require refrigeration and they are battery-operated, which are all important operational benefits for our teams.”

“Our switch to PTS Diagnostics’ CardioChek system advances our mission considerably,” concluded Morgese.

About eHealthScreenings – As the nation’s leading provider of comprehensive wellness screening services, and one of the only true companies specifically centered on biometric screenings, eHealthScreenings focuses all their resources on optimizing screening technology, service levels, incredible customer support, and simplification of the process. With multiple dedicated teams, a network of 200 affiliated office locations, and thousands of nationwide lab locations, eHealthScreenings is focused on perfecting the screening model and experience for

clients such as third party administrators, employee assistance programs, human resources consultants, insurance providers, and wellness companies. Their home office is in San Antonio, Texas. For more information, visit <https://www.ehealthscreenings.com>.

About PTS Diagnostics – PTS Diagnostics is a global provider of point-of-care diagnostic products to the healthcare industry.
